# PropSketch.ai

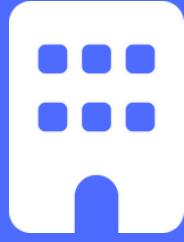

**Property design is a complex process** — starting with **ideas on paper** and ending with fully realized structures. But bringing those ideas to life **takes time, tools, and often expensive software**. What if AI could **transform a sketch into a full digital design** — complete with materials, walkthrough videos, and shareable outputs — **in seconds**? What if design became more intuitive and faster?

# Propsketch.ai

**PropSketch.ai** helps **architects, interior designers, and property developers** turn rough property sketches into beautiful, realistic property designs with AI-powered technology. From sketch-to-design rendering and 3D walkthroughs to material lists and cloud storage, every tool is built to simplify property visualization. Whether you're planning interiors or full developments, PropSketch.ai is your intelligent design partner from concept to showcase. It was created to empower architects, designers, and developers to focus on creativity, not complexity. By combining cutting-edge AI tools with a streamlined interface, PropSketch.ai helps you visualize, refine, and present your designs effortlessly – from napkin sketch to polished proposal.

PropSketch.ai

# Sketch to Design

Upload your hand-drawn sketches and transform them into realistic interior or exterior colored designs with AI.

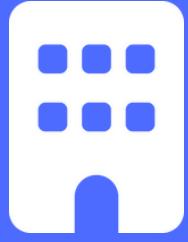

PropSketch.ai

# 3D Walkthrough

Generate stunning 3D video walkthroughs of your design to visualize the final outcome.

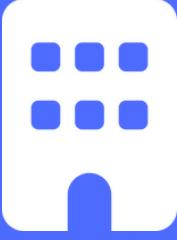

PropSketch.ai

# Material Lists

Get comprehensive lists of materials needed for your design, complete with estimated quantities.

PropSketch.ai

# Customization

Edit and customize your design with text prompts, annotations, labeling, and direct modifications.

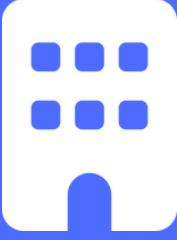

PropSketch.ai

# Cloud Storage

Save and access your property designs easily from anywhere with secure, encrypted cloud storage.

PropSketch.ai

# Easy Sharing

Share your designs with clients and your team for feedback and collaboration via simple cloud links and export options.

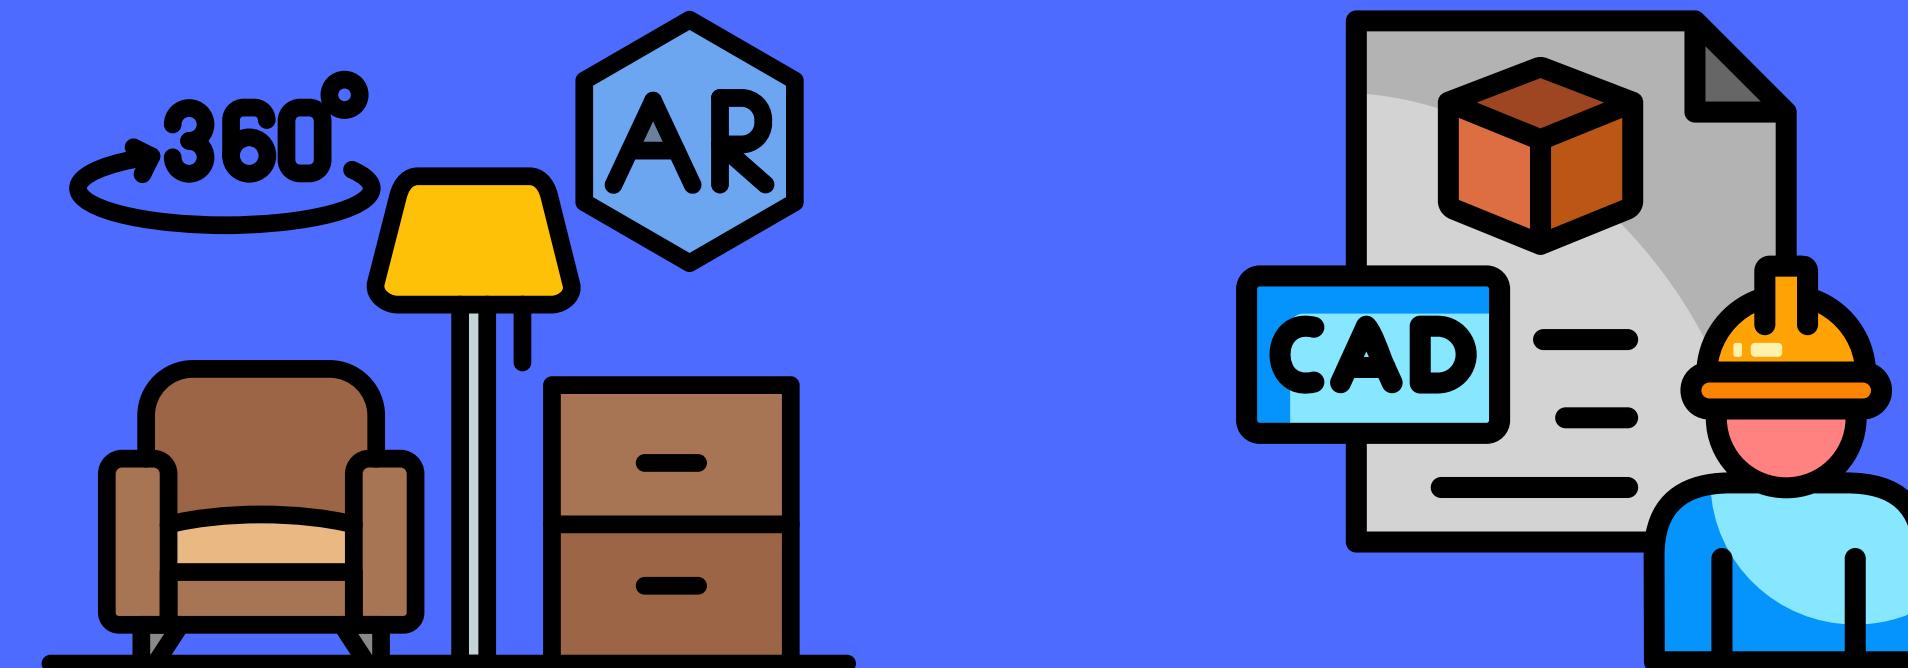

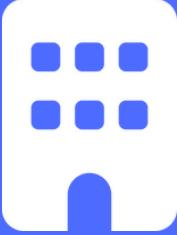

# Our Impact

- **Design Faster & Smarter:** With AI-powered sketch to design conversion and 3D walkthrough videos, you can turn ideas into presentations in seconds.
- **Eliminate Guesswork:** Material lists and visual outputs help you estimate requirements accurately and make informed decisions before development.
- **Collaborate Effortlessly:** Share designs directly with teams or clients using simple cloud links and export tools.
- **Precision & Flexibility:** Whether you're refining interiors or planning an entire layout, PropSketch.ai gives you full control to modify and improve designs on the go.
- **Secure & Accessible:** With cloud storage, your work is always safe and available wherever you need it.
- **Polished Presentations:** 3D walkthroughs and high-quality outputs help you present designs in an impressive, professional format.

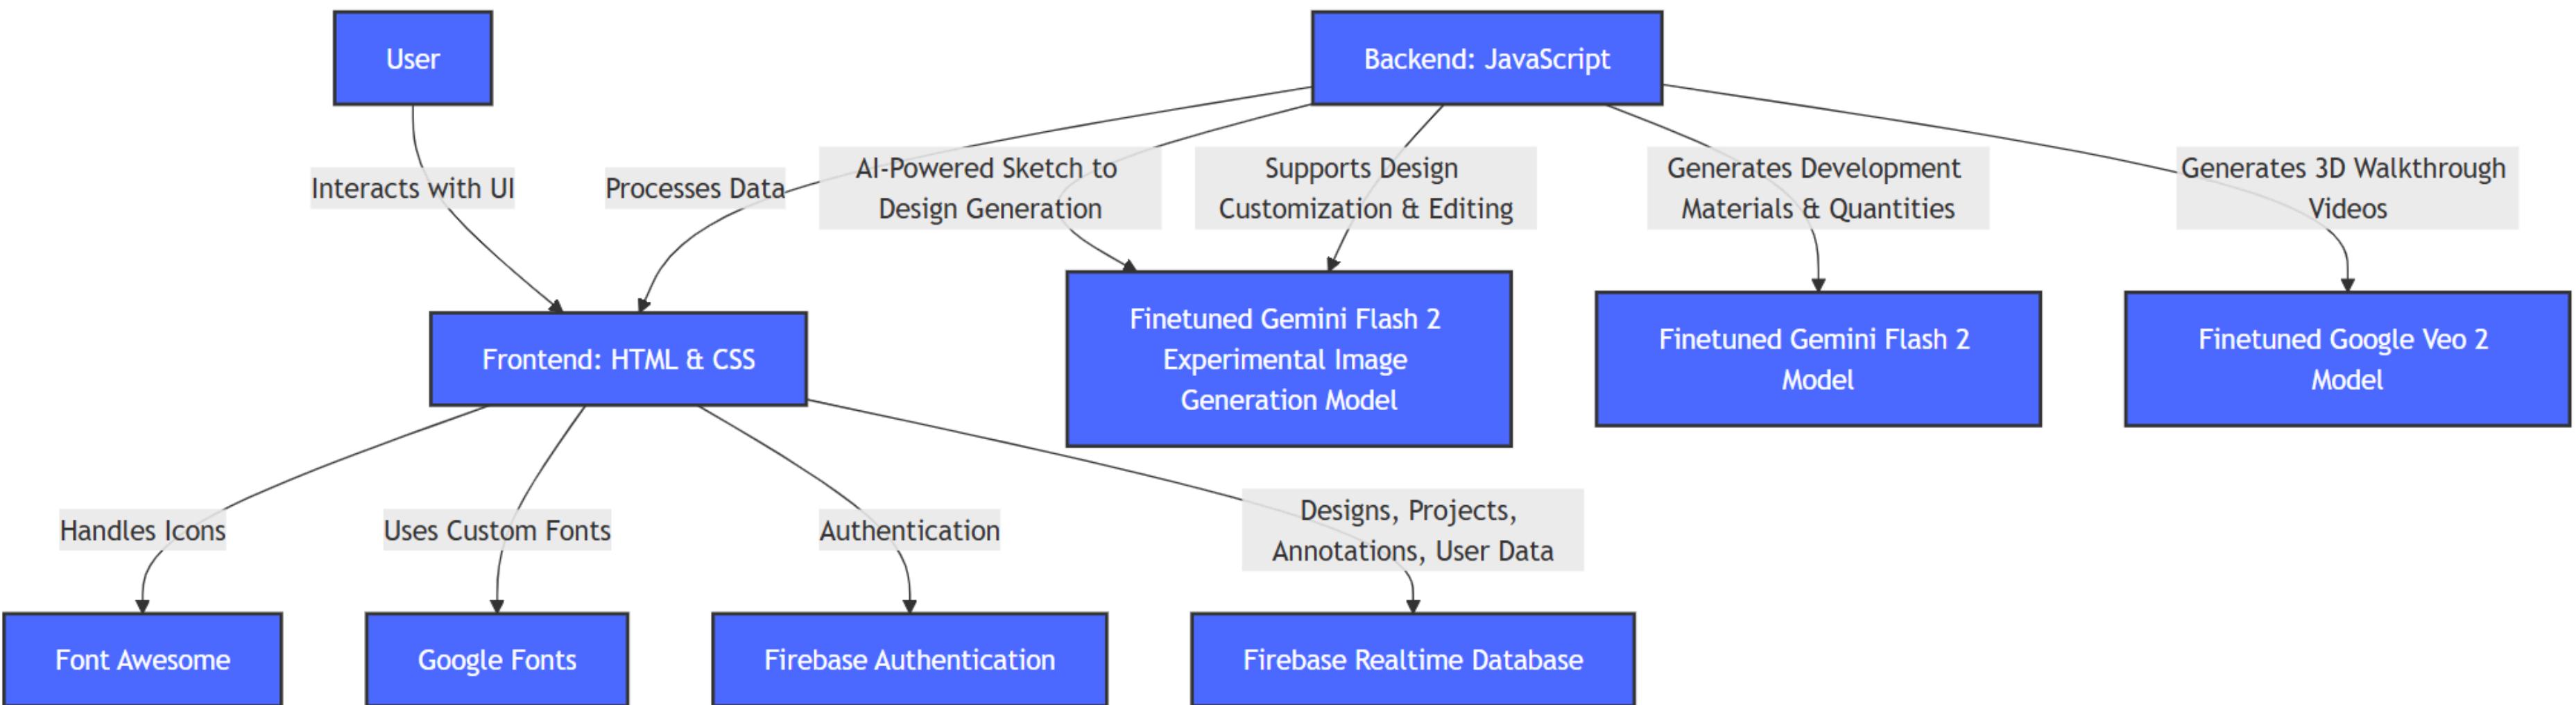

# Future Plans

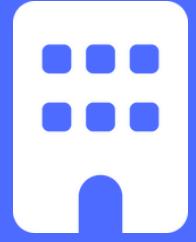

- **AR/VR Integration:** Support for immersive property walkthroughs using AR/VR for client presentations or on-site previews.
- **Import CAD & BIM Formats:** Upcoming support for standard architectural file types and 3D Models to better integrate into your workflow.
